## **PROLOG**

### **AIM :**

To develop a family tree program using PROLOG with all possible facts , rules and queries.

### **SOURCE CODE:**

#### **KNOWLEDGE BASE:**

```
/*FACTS :: */
```

```
male(peter).  
male(john).  
male(chris).

```
brother(X,Y):- male(Y),  
father(X,Z),  
father(Y,W),  
Z==W.
```

```

### **RESULT :**

Thus the implementation of an family tree program using PROLOG with all possible facts , rules and queries and the outputs have been verified
